FOURSIGMA ENGINEERING

# SO YOU WANNA START BIG??

Yes but, we all know that:

# There is no room for everyone!

# Why don’t you consider…. to start small?

# IT’S FULL OF M.S.M. LOOKING FOR DEV

Thousands Micro Small Medium (M.S.M.) Companies are seeking (desperately) for DEV, DEVOPS and IT TECH around the world.

# Every M.S.M. it’s different …
# but often you can find:

Friendly and
Less competitive
environment

Not a fancy
office in a
starching tower
but….
Easy and
Informal place to
work

Short/Small
organization

Less (boring)
meetings

Easy to
understand
company
strategies

Often become
like a family, for
the bad and the
good

# In M.S.M. company probably:

You will be “throw in the pit” as soon as you join, but..
you will see different technologies and tech environments

You will face all the project’s stages: Commercial -> Project -> Dev -> Deploy -> FollowUp

You could became important/keyDEV quite soon and you will have more “power” during contract renew and $

# And after an experience in a M.S.M. company you can continue big!

Often an experience in a small company could give you skills that will be appreciated in a big company!

# 4Sigma Presentation

Four university friends after POLIMI Studies in 2006 join together.
In 2023 we have grown to 20 developers.

**We work in three sw areas:**

**Embedded Linux Software**
**Industrial Automation**
**Web Applications**

# 4Sigma Clients/Partners

## Embedded Software

MARELLI

Nokia Siemens Networks

FINMECCANICA

## Industrial Automation

Low&Bonar
Progress through performance

Salmoiraghi
AUTOMATIC HANDLING

SAINT-GOBAIN

## Web Applications

DAZN
